The magnificence OF NAGARHOLE

Imagine you are a bird soaring high over Nagarhole National Park. In between the dense green cover, you'll spot glistening waterbodies, curling around the terrain. The air is replete with the staccato cries of resident fauna. The incessant whine of cicadas soon mutate from grating to rhythmic white noise. Simian chatter from arboreal perches are punctuated by periods of silence followed by high pitched alarm calls. To the trained ear, those calls distinguish the type of big cat spotted – the menacing striped variety stalking the forest floor or the agile spotted predator looking treewards for a fitting meal.

This richness of flora and fauna make Nagarhole National Park a preferred destination for nature lovers. Big cat sightings are on the rise, and the contiguous tracts of Nagarhole and its adjoining forests also make the Nilgiris Biosphere a pristine, verdant haven for gaur, wild dogs, elephants and herbivores.

Open year-round, the National Park has seasonal landscapes that are a treasure to behold. From the monsoon-fed vibrancy of a forest, to the hot and hazy denudement of peak summer.
